📁 PROJECTS

2025

Cozy Qejani
Currently building a full-stack **eCommerce platform** using the MERN stack (Vite, MongoDB, Express, React, Node) and TailwindCSS. Includes features like product filtering, shopping cart, and checkout. Currently undergoing testing and optimizing for performance and user experience in my development process.

2025

Kuza Beyond ⧉
Built and deployed a high-performance **fintech website** using React and Tailwind, reducing page load times by over 50% and doubling organic traffic through SEO best practices and mobile-first design.

2024

My Portfolio Website ⧉
Crafted a **responsive personal portfolio** with HTML, JavaScript, and TailwindCSS to display projects and contact info. Included scroll reveal animations, SweetAlert modals, and emailJS for messaging. Fully deployed and optimized for mobile and desktop.

2023 – 2024

ParkPave
Developed a **peer-to-peer parking platform** using Bootstrap, PHP, JavaScript, and SCSS, allowing users to list and book parking spaces. Integrated location-based search and user authentication for ease of access. Completed as a university project showcasing full-stack development for urban mobility.
